PROJECTS

- Campus-Compass: University Website for admission purpose
The main goal of the website is to create admissions for university and to create a community of students united by the same ideas, interests, beliefs, etc.
Technologies Used : React Js.
- Shopzone: E-commerce website for shopping
Main goal is to create a robust and user-friendly e-commerce platform that connects shoppers with products or services for online trading. The website will serve as a virtual marketplace where customers can explore, shop.
Technologies Used : Django,Html,Css,Js
- Smart City Waste Management System :We proposed a system called “Smart City Waste Management System” to manage the waste. The sensors are placed in the top of normgarbage bins to measure the amount of trash and alerts the user by sending message when bin filled with trash
